

## CANCER in Children

WOULD YOU SERVE YOUR FAMILY AND FRIENDS TOXIC FOOD?  
WOULD YOU LET YOUR CHILDREN PLAY IN A TOXIC WASTE DUMP?  
WOULD YOU WANT YOUR HOME NEXT TO A TOXIC CHEMICAL PLANT?

NO...YOU SAY

### THEN WHY ARE YOU EATING, LIVING & WORKING IN ONE!

Absurd or ridiculous, you say...Not Really! After researching, studying and teaching people on Chemicals, Neuro-toxins, Petrol-Chemicals, Pharmaceuticals, etc., you should really think again. Because if you, like millions of other people, are using the everyday commonly available cleaning products, personal care and personal hygiene products, then that is exactly what you are doing. Almost all of these common everyday products contain toxic chemical ingredients. These toxins break down your immune system one cell at a time over 10, 15, 20 yrs and slowly create cancer & diseases within, poisoning your environment, your family & YOU!

How is that possible you ask? Well for the answer you really have to start back around the turn of the 20<sup>th</sup> Century (1900's) when chemicals were just really starting to come into existence in use in factories and the military. You see most people back then still used boiling hot water and good old fashion soap. (Lye). When World War (I) broke out there was a very poisonous gas used called "Mustard Gas". It was so inhumane, that after the war it was banned / outlawed by the Geneva Convention to never be used in military battle again. Mustard Gas in short...is almost like combining your bathroom tile cleaner with bleach and your window cleaner with ammonia. *IT'S VERY, VERY DEADLY!!*

During World War (I) and World War (II) there were estimated to be approximately 30,000 chemicals developed, engineered and/or manufactured for the wartime efforts. (Today...there is "Ten Times" that amount) After World War (II) was over, the chemical companies faced a huge problem. They had to find a way to use their wartime efforts in a peaceable way, or else suffer extensive financial loses. You see they had Hundreds of Millions of Tons of Toxic Waste to dispose (Get Rid) of. In 1935, there was a law passed, now known as the "Grand-Fathering Effect". It was Lobbied EXTREMELY Heavily by the Chemical Companies. The law stated that they would not be held ACCOUNTABLE or LIABLE for the long-term ill health effects of the environment or people from the use of their "Wartime Chemicals".

**Example – Did You Know? That Fluoride was one of the single biggest elements used in the making of the Atomic Bomb, and that there were hundreds of millions of tons of “Run-Off Toxic Waste” that was needed to be disposed of.**

**AKA – The 1935 Grand-Father Law comes into play. You see if this law was not in existence the chemical companies would have faced bankruptcy or huge losses because they would have had to PAY to have this toxic waste removed. Instead they use the toxic waste to make YOUR common everyday cleaning products, personal care and personal hygiene products and SELL them to YOU for a HUGE PROFIT!**

***It sounds like “The 7 Dwarfs of the Tobacco Industry” – All Over Again!!***

**What better “Legal Way” the chemical companies have not only to eliminate the expense and risk of disposing of these chemicals, while making a huge profit, by creating a mass consumer market for them? This way the deceived, innocent and un-suspecting public would become the chemical manufacturer’s toxic waste dump, and would pay them for the privilege to do so, through deceptive word advertising.**

**Cleaning products, dishwashing detergents, disinfectants, foods, insecticides, personal care, personal hygiene, pesticides, public water supply, petroleum products just to name a few, were “All Improved” with the addition of toxic chemicals. In the 1950’s, Dow Chemical came out with a slogan “Better Living Through Chemistry”. You were virtually looked at as a communist if you did not support and use all these wonders of modern technology.**

**Example – Did You Know? The microwave oven was banned / outlawed by virtually every European country, yet our government allowed the manufacture, sale and use of this “Modern Technology”. Sound Familiar...I always thought that Radiation was Radiation no matter how you cook it or it cooks you.**

**It is estimated that there is well over 300,000 new chemicals that have been created, designed and introduced into society since World War (II). With the biggest majority of them never being tested for the long term (or even short term) ill health effects of the environment, your family, or you. Oh, I’m sorry...I forgot to mention your pets and wildlife too. The American Public and the World has become the unwitting subject of a massive toxicological experiment.**

**My case in point...the same “Chemical Companies” that created all of this and got you sick in the first place by advertising their chemical products on T.V. in the 50’s, 60’s & 70’s...are the same “Chemical Pharmaceutical Companies” that are “getting you better” by advertising their “Meds” on T.V. in the 80’s, 90’s & 2000’s.**

**The sad reality about this is that the American Public & the World are so un-educated, gullible, ignorant & lazy...YES...ignorant & lazy, that they are allowing this to happen. Many of these chemicals are byproducts of the petrochemical industry, and are known neurotoxins.**

(Front Cover - US News & World Report – June 19<sup>th</sup>, 2000)

### KIDS AT RISK

New evidence points to a link between environmental poisons & learning disabilities

A Neurotoxin and/or Neuro-toxicants are chemicals, which destroy or impair the ability of your brain, lymphatic and/or nervous system to function properly. Children are particularly vulnerable to toxic chemicals. It takes a full year for a newborn child's skull to fully encapsulate while starting to build an immune system. Normal brain development begins in the Uterus and continues all through adolescence. It requires a series of complex processes to occur in a carefully timed sequence: It's estimated that it takes children about 12 years to fully develop one. Cells proliferate and move to the correct spot, synapses form, neural circuits are refined, and neurotransmitters and their receptors grow. Neurotoxins and/or Neuro-toxicants may slow, accelerate or otherwise modify any of these processes. Philip Landrigan of New York's Mt. Sinai School of Medicine says, "You end up with gaps in the wiring". In short, your children "Short Circuit"!!

In 1985, the House Committee on Science and Technology reported that there were 850 known Neuro-toxicants, any of which "may result in devastating neurological or psychiatric disorders that impair the quality of life, cripple and potentially reduce the highest intellect to a vegetative state." After the hearings, the report prompted virtually NO Action. You MUST Take Action YOURSELF!!!

As the brain cells, lymphatic and nervous system are destroyed, the body begins to break down in its ability to perform routine life-sustaining functions. In essence, (Immune System Failure) our antibodies can NO longer fight off bacteria, disease, fungi, parasites, viruses, etc. As these toxins disturb the internal chemical balance, the body begins to cannibalize itself from the inside in a desperate attempt to re-establish its equilibrium, which further debilitates the body and increases vulnerability to disease. No wonder that, in the past few decades, we have seen tremendous increases in all types of chronic, degenerative diseases or neurological disorders.

(Front Page - The New York Times – September 29<sup>th</sup>, 1997)

U.S. Reshaping Cancer Strategy As Incidences In Children Rises

#### Did You Know?

- **C**ancer in children has continued growing 1% per year for decades:
- **A**cute Lymphoblastic Leukemia increased 27% between 1973 - 1990:
- **N**ewborn children face risks, 1 in 600 of developing cancer by age 10:
- **C**ancer in children is now the most common fatal disease, about 10%:
- **E**ach year in the United States over 8,000 Children developed cancer:
- **R**ates in brain cancer have skyrocket between 1973 - 1994, over 40%:

**YOU do not have to be or it does not take a “Rocket Scientist” to figure out that if in just the past 100 years we have gone from 1 in 8,000 cases of cancer to about 1 in 2 today, (American Cancer Society, Governmental & Medical Statistics) that within the next Five (5) years...virtually every single person in this country will have “Live Active Cancer” growing inside them.**

**All the while, your children, your environment, your pets and you are constantly being bombarded with and fed toxic chemical ingredients through the air you breathe, building materials, cleaning products, clothing, food, personal care and personal hygiene products, water supply, the list goes on, and on, and on!!**

## Is Your Home “Ultra-Safe” ?

**My wife, Cheryl & I, have been learning, researching, and teaching on this subject for over (23) years; GOD has given us a gift of knowledge, understanding and wisdom on how to heal the body from cancer and disease naturally. It is our desire to re-educate you on how to heal & improve the overall health of your body.**

**It’s like a gigantic puzzle, there are so many pieces, and sometimes you just do not know where to start. We started reading about the air we breathe, the clothing we wore, the food we ate, the water we bathed in and drank, etc. When we finally pieced together the relationship of how toxic chemicals “Toxins” react in the body, (One of the Major Missing Links) we actually removed from our home (66) sixty-six common everyday products that contained toxic chemical ingredients. After all the researching and studying we had previously done, we thought that we were doing a really great job at staying healthy...WOW...were we WRONG!!**

**Through the chemical, petrochemical and pharmaceutical industries high powered and successful “Deceptive Word Advertising”, the products that those industries are actually selling you, are the products that they want you to actually buy, and deceive you into thinking that you are actually buying the products that you think you actually want to buy.**

Example – Mouthwash: Follow closely; let’s take a trip to the grocery store or better yet, the health food store. Let’s go down the personal care aisle to find your favorite mouthwash that you are currently using. AHH...there it is...it says on the label, “ALL Natural, 100% Organic, Biodegradable & Environmentally Safe”, it looks good, smells good, taste good, so you buy it. Some even say it kills germs!

What do those (4) four “Deceptive Phrases / Words” mean to you? **THINK!!** You think it means; it’s ALL Natural, 100% Organic, Biodegradable and is SAFE for the Environment. **BUT...**what if I told you that the main ingredient or better yet, the inert ingredients (which chemical manufactures **DO NOT** have to list) was say...the poison venom from a Mamba or Rattle Snake. *Would You Still Use It?*

## Top 12 Killers

- |  |  |
|--|--|
|  Bug Killers        |  Mold & Mildew Cleaners |
|  Carpet Shampoo     |  Oven Cleaners          |
|  Ammonia            |  Dishwasher Detergent   |
|  Drain Cleaner     |  Car Care Products     |
|  Furniture Polish |  Laundry Products     |
|  Bleach           |  All Purpose Cleaners |

It may shock you to learn that according to the National Safety Council, more children under the age of (5) Five die of accidental poisoning at home, than are accidentally killed with guns at home. In fact, the (#1) poisoning chemical agent found in the home today...is **CASCADE DISHWASHING DETERGENT!**

Many common ingredients used in products today, like poison venom(s), are “ALL Natural, 100% Organic, Biodegradable & are SAFE for Your Environment”. **YOU SEE...or...MAYBE YOU DON’T SEE...NO** where on their label did they say that it was SAFE for your brain, immune system or vital organs of your body. If you are using any of the products listed above, you can probably bet that you are slowing poisoning your children, your immune system, and pets one cell at a time.

In short, what the chemical, petrochemical and pharmaceutical industries are saying; is that their products are SAFE for the Rocks and Trees...There just Dangerous and/or Deadly to your family, your pets and YOU!

Just to name a few...the following have ALL been linked to toxic chemicals. A.D.D. in children, allergies, asthma, birth defects, brain disorders, bronchitis, cancer, learning disabilities, lymphatic breakdown, mental disorders, M.C.S., multiple sclerosis, nervous system failure, Parkinson’s, scoliosis, skin disorders, etc.

# Did You Know...

Prior to the 1970's, Federal Laws REQUIRED the skull & crossbones symbol to be on ALL of the labels of household products that were...**Dangerous & Deadly!**

More than (7) Seven Million accidental poisonings occur each year, with more than 75% involving children under the age of (6) Six.

—*The Columbia University College of Physicians & Surgeons*

Today, the 2nd highest rate of child poisonings are now ages 9 – 15. By inhaling vapors to “Get High” or “Huffing” toxic household products, permanent brain damage is often the result.

—*Readers Digest, June 96*

**Warning labels...** required by the U.S. Government EPA; Office of Pesticides and Toxic Substances, are as follows:

**DANGER**  
Fatal or Harmful if Swallowed

A TASTE To a TEASPOON  
Can be **FATAL** To an ADULT

**WARNING**  
Harmful or Fatal if Swallowed

A TEASPOON To an OUNCE  
Can be **FATAL** To an ADULT

**CAUTION**  
Harmful or Fatal if Swallowed

A OUNCE To a PINT  
Can be **FATAL** To an ADULT

If these Small Amounts of “**TOXIC CHEMICALS**” could be fatal to an adult By Inhalation, Ingestion or Absorption thru your skin, just imagine what...

**THEY ARE DOING TO YOUR CHILD!**

What you truly have to understand about these “NEW Warning Labels” are two very important issues.

1. These tests were conducted on Adult Males, In Their Prime, and were an average of 185 lbs ea. Their bodies, brain, immune systems, skeletal frames, vital organs, etc. obviously had already been developed. Infant babies that are just born, or young children starting to develop and grow their bodies, brain, immune systems, skeletal frames, vital organs, and weigh only 15-30 lbs, DON'T STAND A CHANCE. They will develop Cancer & Disease. The irony is the majority of people are Ignorant to the facts...**What about You?**

2. **GREED – MONEY – POWER!** This leads to the major problem that you'll read about below. If you are at least (45), do you remember when you were growing up and your parents or grandparents showed you and told you that you were NEVER to touch anything that had the Skull & Crossbones Symbol on it. That (1) One symbol not only probably saved your life but millions of other children also. Haven't you ever wondered what happened to it?

The chemical companies lobbied Congress and the E.P.A. to remove that one symbol in place of the New Warning Labels. Why...**Greed – Money – Power!**

## THE PROBLEM

Cancer rates continue to increase every year since 1970! Brain cancer in children is up 40% in 20 years. Toxic chemicals are largely to blame.

—***Cancer In Children Rises, NY Times September 29, 1997***

New evidence points to a link between environmental poisons and learning disabilities. Chemicals in the environment come under scrutiny as the number of childhood learning problems soar.

—***Kids at Risk, US News Cover Story June 19, 2000***

Feeling ill? It could be your housekeeping habits, according to physicist Philip Dickey, Ph.D., director of the Household Toxics Program, Seattle.

—***Make a Clean Sweep, Vegetarian Times September 2000***

One common ingredient found in most cleaning and personal care products is formaldehyde. Manufacturers are not required to list this toxic chemical as an ingredient. A Material Safety Data Sheet, which, by law, must be supplied to anyone who uses any chemical product in the workplace, warns: “Suspected carcinogen; May be fatal if inhaled, swallowed, or absorbed through skin.”

—***Government Material Safety Data Sheet (MSDS)***

The National Institute of Occupational Safety and Health analyzed 2,983 chemicals used in personal care products. The final results were as follows:

-  884 of the chemicals were toxic
-  778 caused acute toxicity
-  376 caused skin and eye irritation
-  314 caused biological mutation
-  218 caused reproductive complications
-  148 caused cancerous tumors

**WARNING” You Cannot Trust The New Warning Labels!**

## THE PROBLEM & THE SOLUTION

---

### Colloidal Micelles: A Technical Summary

Colloidal micelle technology is a new approach in the field of organic chemistry. It was discovered during the early 1980's by an environmentally conscious group of scientists. With minor modifications the basic technology can produce an impressive variety of poison-free, environmentally friendly products. Products created by this new technology can potentially replace millions of tons of toxic chemicals such as household, industrial and marine cleaners; agricultural applications including pesticide treatments; personal hygiene products such as acne preparations and lice shampoo; automobile; motorcycle and boat maintenance products; pet care products such as flea dip and flea shampoo; and insect repellents.

The colloidal micelles in the SOLUTIONS-4-YOU.COM® products are composed of natural organic ingredients. The word “organic” as it is used here means both “carbon-based” and “naturally occurring in nature, not harmful to living systems.” The word “colloidal” pertains to the ability of tiny particles to remain suspended in a solution. The word “micelle” means “cell that emulsifies.” We believe that this is the first time micelle technology has been achieved with the use of natural ingredients that are completely safe for the environment, humans and pets.

In micelle technology, molecules create a field similar in some respects to a magnetic field. However, the molecular attraction induced by the microscopic micelles is not the attraction occurring in a magnetic field between opposite poles (positive and negative). Instead, the molecular micelle attraction occurs between like poles (positive and positive, and negative and negative). Each micelle molecule has a hydrophilic (water-seeking, negative) pole and a hydrophobic (water-repelling, positive) pole. The hydrophilic poles attract each other and form the interior of the micelle the hydrophobic poles attract each other and form a circular, tough outer surface. When a single micelle molecule comes in contact with a heavy hydrocarbon molecule-in other words, oil or grease, which is always hydrophobic – the hydrophobic center of the micelle molecule bonds to the hydrocarbon molecule, thus trapping it inside itself. In this way, the heavy hydrocarbons are pulled away from the original surface to which they were attracted (cloth, metal, skin, wood, etc.) and into the center of the micelle. The oil or grease remains permanently trapped inside the micelle molecule and is simply washed away with water.

The precise details of the manufacturing process for these products are trade secrets. The manufacturing process and the products themselves meet OSHA standard 29 CFR 1910 1200. OSHA stipulates no specific disposal requirements. The products may be poured down a sewer line or directly into the ground.

---

**A**ccording to the U.S. Government and product manufacturers, the following is a partial list of chemical poisons found in products that are absorbed, ingested or inhaled by the body before you even eat breakfast. These lists **DO NOT** include the use of common household cleaners!

---

## 30 Ways You **POISON** Yourself Before Breakfast & THE NEGATIVE HEALTH EFFECTS

**1 Alcohol, Acids & Alkali:** anemia, cancer, coughing, cramps, death, depression, disorientation, dizziness, fatigue, headaches, heart damage, muscle weakness, nerve damage, organ damage, rashes, respiratory problems, sleeping problems, vision problems and more.

**2 Bleaches & Chlorines:** anemia, child development problems, cancer, diabetes, gastrointestinal cancer, gland cancer, headaches, heart disease, immune system breakdown, mental function difficulties, organ cancer, pulmonary edemas, severe eye problems, urinary tract cancer and more.

**3 Detergents & Emulsifiers:** allergic reactions, blindness, cancer, cataracts, interference with nutrient absorption, loss of hair, organ damage, reproductive damage, scalp eruptions, skin irritation, strips skin of protective oils and more.

**4 Dyes & Fragrances (Synthetic):** ADD, allergic reactions, cancer, convulsions, depression, dizziness, headaches, Hodgkin's, hyperactivity, irritability, Leukemia, muscular aches and pains, organ damage, problems-behavioral and emotional, reproductive damage, skin rashes, stomach upsets, vertigo, violent coughing and sneezing, tumors-multiple and more.

**5 Heavy Metals (Toxic):** abdominal cramps, Alzheimer's, brain disorder, cancer, emotional and immune system disorders, genetic damage, hyperactivity, motor skill difficulties, mouth sores, muscle weakness, nausea, pain in your bones and your joints, reduced intelligence, short attention span and more.

**6 Fungicide, Insecticide & Pesticides:** ADD, birth defects, cancer, death, dizziness, fatigue, flu-like symptoms, genetic mutations, gland tumors, insomnia, memory loss, muscle weakness, nausea, nervous system disorder, pain in your bones and your joints, organ damage, stomach cramps, swelling of body parts and more.

**7 Petrochemicals:** allergic reaction, asthma, cancer, depression and fatigue, headaches, inhibit skin functions, intestinal gas, immune system disorders, premature aging, pimples, rashes, respiratory failure, sensitivity to the sun, splitting of your finger and toe nails and more.

**8 Preservatives (Synthetic) & Volatile Organic Compounds (VOC's):** asthma, cancer, cramps, digestive problems, eye and organ damage, headaches, mental confusion, muscle weakness, pain in your bones and your joints, reproductive damage, respiratory problems, skin rashes, tumors and much, much more!!
